

**Easy & Strong Video Encryption Software**

# ABOUT E-PLAYER

- Video Encryption Software protects videos & other E-learning content by securely encrypting your content files and distributing them with your authorized target audience.
- It is a process of digitally hiding your videos to prevent unwanted interception and viewing of the transmitted videos.
- The process involves encrypting videos using an encoding software and hardware to secure the content.
- No one can view the encrypted videos without first decoding them.

# VIDEO ENCRYPTION SOFTWARE FEATURES

## Strong Encryption

The software encrypts your video content and allows you to securely distribute them to your authorized target users. The encryption system offers AES 256-bit encryption.

## Video Playback Attributes

With encryption, you can configure Video Playback Time, Video Open Occurrences and Expiry date.

## Activation

Activation via various communication channels including Messaging, Online, and Email

## Single Screen Restriction

Restricts video to single / primary screen.  
No one can play on more than one screen.

## Video Analytics

Which video was played? When was it played? Video playback time Expiry date of video

## Screen Capture Protection

Prevent anyone to record ongoing session via Screen Capture or Video Recording Software running in the background during a session and also prevent screen sharing via Skype, Team Viewer, and other similar tools.

## Watermarking

You can trace any unauthorized use of your videos across the internet using **Watermark technique** on the encrypted videos.

## Aggressive Pricing

World Class Security Features at most affordable Pricing.

## Distribute

Encrypted videos can be securely distributed on Cloud, USB-Pen drive, DVD.

# WHO CAN USE IT

- Professors, Teachers, Lecturers, Tutors, Coach, Instructors, Trainers, Gurus, Businessmen, Specialists, Individual Professionals, Filmmakers and so on.
- Literally anyone can Encrypt the videos and Distribute them to their authorized target audience like School Students, College Students, University Students, MBA Students, CA Students, IPCC Students, IIT JEE Students, IES Students, Medical Students, CMAT Students, CAT Students, Consumers, Media Houses, Companies etc.
- Sell those video files as easy as on USB Pen drive, DVD, and even on Cloud.
- Download our software now and let your students and users experience the most flexible approach you will provide to learn from anywhere, and at any time.
